DETAILED ACTION

Response to Amendment

1. This action is in response to the communication filed on September 2, 2004.
2. Claims 1-21 are pending in this action. Claims 22-41 have been canceled.

Allowable Subject Matter

3. Claims 1-21 are allowed over the prior art of record.
4. The following is an examiner's statement of reasons for allowance:

The applicant teaches a system for processing sortation information spoken by a user, and for generating a return signal with a computer for transmission back to the user on a telephony system in response to sortation information spoken by the user. The prior art of record fails to teach or fairly suggest the claimed combinations of features. Particularly the prior art of record fails to teach or fairly suggest generating a return signal comprising a voice signal and a data signal in response to spoken sortation information, voice signal and data signal are sent to a second modem, second modem encode the data signal and voice signal for transmission to a first modem, the first modem decode the data signal and the voice signal and separate received voice signal and data signal and send the voice signal to the wireless telephony set.

Regarding the prior art of record, for example Reed (US 6,394,278) teaches a system and method for assisting an operator in sorting mail includes a wireless headset equipped with a microphone, and a workstation that includes a processing unit, voice-recognition and voice-synthesis circuitry, and a database. In operation, generating a return signal comprising a data signal from a database in response to spoken sortation

information, received data signal synthesized to speech signal and sent to headset. However, Reed fails to teach or fairly suggest generating a return signal comprising a voice signal and a data signal in response to a spoken sortation information, voice signal and data signal are sent to a second modem, second modem encode the data signal and voice signal for transmission to a first modem, the first modem decode the data signal and the voice signal and separate received voice signal and data signal and send the voice signal to the wireless telephony set. Therefore, claims 1-21 are allowed over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
